SPEYSIDE - HOUSING

- © Crown copyright 2017 OS 100023422 The Moray Council
- © Crown copyright. Data supplied by National Records of Scotland

Levels of home ownership across the area are largely in line with Moray. Exceptions to this are Aberlour and Knockando where there are significantly higher percentages of home ownership, and Tomintoul which has much fewer home owners. Instead, Tomintoul has a higher incidence of social/private landlord than is the 'norm' for Moray. In addition Tomintoul, is one of several areas with significantly higher percentages of people living rent free than anywhere else in Moray, suggesting a link between employment in distilleries and tied housing.

The rural nature of Speyside results in a greater need for private transport.

Knockando has more households with 3 or more cars/vans than anywhere else in Moray and a number of areas elsewhere in Speyside have significantly more households with 2 or more cars/vans than the Moray average.

The overall adult population (aged 16-64) of the Speyside ASG hold low levels of qualification and there are areas where significantly higher percentages of adults have no qualifications than is average for Moray. Figures available for the area's three main towns (Aberlour, Dufftown and Rothes) show that there are significantly fewer households where an adult is qualified up to the level of higher exams or where residents aged 16-18 are studying full time. However, it is notable that the four more rural parts of the ASG have higher than average percentages of adults educated to degree level and above.

Key – Speyside ASG

Percentage of adults with no qualifications (above average)

Households where an adult is qualified up to the level of higher exams (below Moray average)

Residents aged 16-18 are studying full time (bottom quartile)

Households where an adult is educated to degree level and above (above average)
